

# Anmodning om vurdering av legemiddel i Nye metoder

## Skjema for leverandører

En leverandør som ønsker offentlig finansiering av et legemiddel/legemiddelindikasjon i den norske spesialisthelsetjenesten, skal anmode om vurdering i Nye metoder ved å fylle ut dette skjemaet.

Utfyllt anmodningsskjema sendes til Nye metoder: [nyemetoder@helse-sorost.no](mailto:nyemetoder@helse-sorost.no)

Leverandøren skal på anmodningstidspunktet både ha et forslag til type helseøkonomisk analyse og en plan for når de leverer dokumentasjonen. Merk at dokumentasjon i henhold til oppdraget fra Bestillerforum for nye metoder må leveres inn senest 12 måneder etter anmodningstidspunktet.

Hele anmodningsskjemaet skal fylles ut. Mer informasjon og veiledning finnes i artikkelen [For leverandører \(nyemetoder.no\)](https://nyemetoder.no)

**Merk:** Skjemaet vil bli publisert i sin helhet på [nyemetoder.no](https://nyemetoder.no).

**Innsender er klar over at skjemaet vil bli publisert i sin helhet (må krysses av):**

**Fyll ut dato for innsending av skjema:** 28.04.2026

| <p>4.5 Har anmodet indikasjon vært i «accelerated assessment» hos EMA?</p>   | <p>Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/></p>   |
| <p>4.6 Har legemiddelet «orphan drug designation» i EMA?</p> <p><i>Hvis ja, fyll ut dato</i></p>   | <p>Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/></p> <p>Dato for «orphan drug designation»:</p> <p>Klikk eller trykk for å skrive inn en dato.</p>   |

## 5 Ordning for forenklet vurdering av PD-(L)1-legemidler

|   |  |
|---|--|
| <p>5.1 Er legemiddelet registrert i Nye metoders ordning «Forenklet vurdering av PD-(L)1-legemidler»?</p> | <p>Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/></p> |
|---|--|

## 6 Sammenlignbarhet og anbud

|  |  |
|--|--|
| <p>6.1 Finnes det andre legemidler med lignende virkningsmekanisme og /eller</p> | <p>Ja <input checked="" type="checkbox"/> Nei <input type="checkbox"/></p> |
|--|--|

|   |   |
|---|---|
| tilsvarende effekt til den aktuelle indikasjonen?   | Kommentar:  |
| 6.2 Vurderer leverandør at legemiddelet i anmodningen er sammenlignbart med et eller flere andre legemidler som Nye metoder har besluttet å innføre til den samme indikasjonen?<br><br><i>Hvis ja, hvilke(t)? Oppgi ID-nummer på metoden/metodene i Nye metoder</i> | Ja <input checked="" type="checkbox"/> Nei <input type="checkbox"/><br><br>Legemiddel og ID-nummer:<br>Alfasigma har foretatt en indirekte sammenligning (ITC) som støtter den sammenlignbare effekt- og sikkerhetsprofilen mellom Jyseleca og de andre legemidler som Nye metoder har besluttet å introdusere til samme indikasjon. Analyser er tilgjengelige for både TNF-naive og erfarne pasienter.<br><br>See section 3.2. |
| 6.3 Er det eksisterende anbud på terapiområdet som kan være aktuelt for legemiddelet?   | Ja <input checked="" type="checkbox"/> Nei <input type="checkbox"/><br><br>Kommentar:<br>2606b TNF BIO  |

## 7 Nordisk samarbeid JNHB (Joint Nordic HTA-bodies)

|   |  |
|---|--|
| 7.1 Er anmodet indikasjon aktuell for utredning i det nordiske HTA-samarbeidet JNHB?<br><br><i>Hvis nei, begrunn kort</i> | Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/><br><br>Begrunnelse:<br><br>Jyseleca og andre avanserte behandlinger som er relevante for denne indikasjonen er inkludert i konfidensielle avtaler med SYKEHUSINNKJØP HF. |
|---|--|

## 8 Europeisk samarbeid om vurdering av relativ effekt og sikkerhet (HTAR)

|  |  |
|--|--|
| 8.1 Er anmodet legemiddel/indikasjon omfattet av regelverket for utredning av relativ effekt og sikkerhet i europeisk prosess (HTAR)?<br><br><i>Hvis ja, fyll ut dato for søknad om MT til EMA</i> | Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/><br><br>Dato for søknad til EMA:<br><br>Klikk eller trykk for å skrive inn en dato. |
|--|--|

## 9 Helseøkonomisk dokumentasjon og forslag til helseøkonomisk analyse

|  |  |
|--|--|
| 9.1 Hvilken type helseøkonomisk analyse foreslår leverandøren? | Det antas at en eventuell innføring av Jyseleca til denne indikasjonen ikke vil påvirke det totale antall pasienter som behandles. Jyseleca vil inngå i anbud og dermed eventuelt erstatte andre etablerte |
|--|--|

|  |  |
|--|--|
| <p><i>F.eks. kostnad-per-QALY analyse eller kostnadsminimeringsanalyse.</i></p> <p><i>Begrunn forslaget</i></p>  | <p>legemidler. Det antas derfor at en eventuell innføring a Jyseleca trolig ikke vil medføre budsjettvirkninger av betydning for spesialisthelsetjenesten.</p> <p>Vi antar derfor at prisnotat (med eller uten en forenklete metodevurdering) er aktuelt for denne indikasjonen.</p> |
| <p>9.2 Pasientpopulasjonen som den helseøkonomiske analysen baseres på, herunder eventuelle undergrupper.</p>  | <p>Ikke relevant.</p>  |
| <p>9.3 Hvilken dokumentasjon skal ligge til grunn? (H2H studie, ITC, konstruert komparatorarm etc.)</p> <p><i>Angi det som er relevant med tanke på hvilken type analyse som foreslås.</i></p> | <p>Ikke relevant.</p>  |
| <p>9.4 Forventet legemiddelbudsjett i det året med størst budsjettvirkning i de første fem år.</p>   | <p>Ikke avklart. Pris er konfidensielle.</p>   |
| <p>9.5 Forventet tidspunkt (måned og år) for levering av dokumentasjon til Direktoratet for medisinske produkter og/eller Sykehusinnkjøp HF.</p> <p><i>Tidspunkt må oppgis</i></p>             | <p>At CHMP (September 2026)</p>  |

## 10 Sykdommen og eksisterende behandling

|   |  |
|---|--|
| <p>10.1 Sykdomsbeskrivelse for aktuell indikasjon</p> <p><i>Kort beskrivelse av sykdommens patofysiologi og klinisk presentasjon / symptombilde, eventuelt inkl. referanser</i></p> | <p>Sykdomsbeskrivelse og pasientgrunnlag</p> <p>Ankyloserende spondylitt (tidligere kalt Bekhterevs sykdom) er en kronisk antiinflammatorisk sykdom som hovedsakelig angriper bekkenet, ryggen, nakken og brystkassen, men også perifere ledd kan rammes. Betennelse i et av leddene nederst i ryggen med strukturforandringer påvist ved røntgen er et av diagnosekriteriene. Sykdommen kjennetegnes først og fremst ved morgenstivhet i ryggen og i mindre grad av smerter. Typisk er at smerter og stivhet bedres ved aktivitet, men ikke ved hvile. Sykdommen er hyppigst hos individer med genetisk disposisjon og debuterer vanligvis før 40 års alder. Tilstanden innebærer økt tilbøyelighet til inflammasjon på steder der sener,</p> |
|---|--|

|   |  |
|---|--|
|   | <p>ligamenter eller leddkapsler fester til ben (entesitt). (3)<br/>Tilstanden er hyppigere hos menn enn hos kvinner.<br/>Prevalensen i europeisk befolkning er mellom 0,15 og 0,5%</p> <p>Aksial spondylartritt (axSpA) er en, kronisk, inflammatorisk artrittsykdom i vertebralcolumna (spondylitt) og iliosakralledd (sakroiliitt). Den debuterer oftest før 45 år alder og gir plager med kroniske ryggmerter samt stivhet i rygg som lindres ved aktivitet. Andre muskel- og skjelettmanifestasjoner er artritt, entesitt og daktylitt. Fremre uveitt, inflammatorisk tarmlidelse og psoriasis kan opptre som ekstraartikulære manifestasjoner. Sykdomsgruppen er assosiert med HLA-B27 og pasienter med aktiv sykdom har ofte forhøyet akutfaserespons. Sykdomsårsaken er ukjent. AxSpA omfatter gruppen av pasienter hvor symptomer fra bekken/rygg/nakke dominerer, mens ved Perifer Spondyloartritt (pSpA) dominerer symptomer fra perifere ledd (artritt, entesitt, daktylitt). 4</p> |
| <p>10.2 Fagområde</p> <p><i>Angi hvilket fagområde som best beskriver metoden</i></p>   | <p>Velg fagområde fra menyen:</p> <p>Immunologi</p>  |
| <p>10.3 Kreftområde</p> <p><i>Hvis metoden gjelder fagområdet Kreftsykdommer, angi hvilket kreftområde som er aktuelt</i></p> | <p>Velg kreftområde fra menyen:</p> <p>Velg et element.</p>  |
| <p>10.4 Dagens behandling</p> <p><i>Nåværende standardbehandling i Norge, inkl. referanse</i></p>                             | <p>Current standard of care include options from the TNF inhibitors class (adalimumab, etanercept, certolizumab, golimumab), the IL-17 class (secukinumab, bimezikumab), and the JAK-inhibitor class (tofacitinib in radiographic axSpA only). It is worth noting that ixekizumab (IL-17) and upadacitinib (JAKi) have not been recommended in Norway. The recommendation of filgotinib would therefore offer a second option in radiographic axSpA and be the first option from the JAKi class to be available in non-radiographic axSpA. In current norwegian guidelines, tofacitinib (JAKi) is ranked before IL-17s. <a href="#">TNF BIO - Sykehusinnkjøp HF</a></p>  |
| <p>10.5 Prognose</p>  | <p>Despite the availability of advanced therapies (TNFi, IL-17i, JAKi), many patients fail to achieve sustained disease control:</p>   |

*Beskriv prognosen med nåværende behandlingstilbud, inkl. referanse*

- **Suboptimal response rates:** Only around 30–60% of patients reach ASAS40<sup>1-4</sup>, ASAS20<sup>4-10</sup>, or BASDAI50<sup>11-12</sup> responses within 3–24 months, and just 18–24% achieve ASDAS <1.3 remission, within this window<sup>13</sup>.
- **High discontinuation rates:** Approximately 33–50% of patients with axSpA discontinue advanced therapies within 2 to 4 years<sup>14-17</sup>.
- **High switching rates:** Treatment switching is also common, with around 7–27% of patients switching to another biologic often due to lack of efficacy or tolerability<sup>14</sup>, and the time to first switch is often short, occurring within just 5 to 8 months of initiating bDMARD therapy<sup>16</sup>.
- bDMARDs use is limited by:
  - Immunogenicity, leading to secondary loss of efficacy<sup>18</sup>.
  - Parenteral administration burdens and injection-site reactions, which may not be preferred by some patients<sup>19-21</sup>.
  - Limited suitability for certain EMMs, which complicates treatment selection and sequencing in clinical practice and often necessitate therapy changes even when axial symptoms are controlled<sup>22-23</sup>.

Additional effective treatment options are needed to manage the diverse clinical features of axSpA and to accommodate patients' individual preferences regarding route of administration and achievement of specific treatment targets.

## 12 Igangsatte og planlagte studier

12.1 Er det pågående eller planlagte studier for legemiddelet innenfor samme indikasjon  Ja  Nei

|   |   |
|---|---|
| <p>som kan gi ytterligere informasjon i fremtiden?</p> <p><i>Hvis ja, oppgi forventet tidspunkt</i></p> | <p>A phase 4 study is in the design stage. Expected 2027.</p>   |
| <p>12.2 Er det pågående eller planlagte studier for legemiddelet for andre indikasjoner?</p>            | <p>Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/></p> <p>Klikk eller trykk her for å skrive inn tekst.</p> |

|  |   |
|--|---|
| <h3>13 Diagnostikk</h3>  |   |
| <p>13.1 Vil bruk av legemiddelet til anmodet indikasjon kreve diagnostisk test for analyse av biomarkør?</p> <p><i>Hvis ja, fyll ut de neste spørsmålene</i></p> | <p>Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/></p>  |
| <p>13.2 Er testen etablert i klinisk praksis?</p> <p><i>Hvis ja, testes pasientene rutinemessig i dag?</i></p>   | <p>Ja <input type="checkbox"/> Nei <input type="checkbox"/></p> <p>Hvis ja, testes pasientene rutinemessig i dag?</p> <p>Ja <input type="checkbox"/> Nei <input type="checkbox"/></p> |
| <p>13.3 Hvis det er behov for en test som ikke er etablert i klinisk praksis, beskriv behovet inkludert antatte kostnader/ressursbruk</p>                        | <p>Klikk eller trykk her for å skrive inn tekst.</p>  |

|   |   |
|---|---|
| <h3>14 Andre relevante opplysninger</h3>  |   |
| <p>14.1 Har dere vært i kontakt med fagpersoner (for eksempel klinikere) ved norske helseforetak om dette legemiddelet/indikasjonen?</p> <p><i>Hvis ja, hvem har dere vært i kontakt med og hva har de bidratt med?</i></p> <p><i>(Relevant informasjon i forbindelse med rekruttering av fageksperter i Nye metoder)</i></p> | <p>Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/></p> <p>Klikk eller trykk her for å skrive inn tekst.</p> |
| <p>14.2 Anser leverandør at det kan være spesielle forhold ved dette legemiddelet som gjør at en innkjøpsavtale ikke kan</p>  | <p>Ja <input type="checkbox"/> Nei <input checked="" type="checkbox"/></p> <p>Klikk eller trykk her for å skrive inn tekst.</p> |

|  |   |
|--|---|
| <p>basere seg på flat rabatt for at legemiddelet skal kunne oppfylle prioriteringskriteriene?</p> <p><i>Hvis ja, begrunn kort.</i></p> <p><i>Hvis ja, skal eget skjema fylles ut og sendes til Sykehusinnkjøp HF samtidig med at dokumentasjon til metodevurdering sendes til Direktoratet for medisinske produkter.</i></p> <p><i>Nærmere informasjon og skjema:</i><br/><a href="#">Informasjon og opplæring - Sykehusinnkjøp HF</a></p> |   |
